## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not clearly describe the term airbrush when used to define the garden hose nozzle. One of ordinary skill in the art would consider an airbrush to be a device that sprays a liquid with compressed air. There is no discussion in the specification of using compressed air to spray water from the garden hose nozzle, therefore, it is not clearly understood what is meant by "airbrush". Also, the specification does not adequately describe how the connector and the rotary outlet rotate round the insert notch to from a whirling state. It appears that the rotary outlet only pivots in an up and down motion not in a whirling state where it would move in a constantly spinning circular motion.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3752

4. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Where applicant acts as his or her own lexicographer to specifically define a term of a claim contrary to its ordinary meaning, the written description must clearly redefine the claim term and set forth the uncommon definition so as to put one reasonably skilled in the art on notice that the applicant intended to so redefine that claim term. *Process Control Corp. v. HydReclaim Corp.*, 190 F.3d 1350, 1357, 52 USPQ2d 1029, 1033 (Fed. Cir. 1999). The term "airbrush" in claims 1-5 is used by the claim to mean "hose nozzle", while the accepted meaning is "an atomizer using compressed air to spray liquids." The term is indefinite because the specification does not clearly redefine the term. It appears throughout the specification that the garden hose nozzle is used to spray water only, there is no description of compressed air used to spray water from the garden hose nozzle. It is recommended that the phrase --hose nozzle-- is used in place of "airbrush" throughout the claims.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Huang, Ericksen et al, Wang and Kao show garden hose nozzles with rotary outlets.
